Elves of the Bow

By Elliot Smith

Scenario Background

In the Land of Aguyna in the Sixth Age the Elves of the Wardana wood have rallied together under the power of the new Elf Sorcerror Hortana Vordig. Taking the King by surprise the Elves attacked with force capturing the Capital of Aguyna, Aguyas. The Academy of Heroes have sent an army to destroy the Elves and rid them once and for all from Aguynas base. Searching for the Sword of their Grandfather the Heroes find it missing with a note in its place.

The Master wants it for himself.

Mission Goals

Kill the Elves who have taken over Aguyas!

Important: Start with 7 Conquest Tokens and 300 coins.
Start by the Glyph in the Gate Room.

No spawning can be used except for in the Main City.

The Levers by the doors in the Gate Room open the door nearest them. The Middle gate opens if both Levers are in use. The Levers are the only things that can open the Gates. A Lever can be put out of use after it has already been used.

The Rubble Tokens are a wall and can be moved along if elevated up onto it. There is a rubble token under every Skeleton marker and Master Sorcerror. Staircases don't make a passage to another staircase but goes up onto the wall in front off the staircase. Don't place Skeletons instead put out un used Hero figures these are Elves. Heroes can fly up onto the Wall if they have the ability.
Attacking the Wall and of the Wall is simple.
Range fires as normal.
Meelee can only reach with Reach.
Magic fires as normal.

The Elves have 8 Health 1 Armor 4 Speed and attack with the Silver Treasure Bow of Bone each.

Do not place out The Main City until one of the doors is open. You can place out what is on the tiles in both The Main City and Gate Room.

Heroes start with Shillelagh, Magic Bow, Staff of Punishment and one of the Hero players choice but must be a weapon.

The ?'s nearest the active Glyph are Heroes of the Academy.
They are the same as the Elves but have the Staff of Fire instead.

The Heroes of the Academy and Elves are the same as Monsters.
The Hero player takes the Heroes of the Academy turns at the start of his turn.

When the Main City is first revealed more Heroes of the Academy arrive were the old ones appeared so the number of Heroes of the Academy is six.

The Cloak of Time and Space is actually the Wings of Regiroth.
Icetooth is actually the Frost Axe.
The Staff of Light is actually the Staff of Knowledge.
Trueshot is actually an Elven Bow.
The Shield of the Dark Gods is actually the Dragon Scail Mail.

All coin piles are worth Two Hundred coins.

The Elves in The Broken Wall are Elite Elves and have 3 Armor 10 Health 5 Speed and have Elven Bow's.

The Master Sorcerror is Hortana Vordig he is the same as a normal Master Sorcerror but has 9 more Health and 2 more Armor he also has the Scarab of Death Gold Treasure.

In the Broken Wall firing over with Range or Magic needs double the Range.

The Wall in the Broken Wall area is broken and it costs 4 movement to jump across.

Gate Room

The three gates are up ahead a white feather flys past the Heroes faces and over their shoulder's the Academy arrives holding Staffs of Fire. A host of Elves is ready on the wall. A huge army forms ranks in The Main City and far ahead Hortana enters into the Broken Wall where behind is the King's throne.

The Main City

An army of creatures is surronded by twelve Kobolds and Four objects worth 1000 coins are in the Main City even though the dodgy shopkeepers in town will only give the Heroes 500.

The Broken Wall

Elf Elites are on the wall and up ahead is the Sorcerror Hortana.

Read if Hortana is Killed:
Hortana staggers of the edge of the broken wall to his doom. His Elves lay slain around him. The King enters from behind the door ahead leading to the Throne Room.

"Heroes I must thank you without your help me and the people of good in Aguyna would be dead please take this 7027 coins and this relic," the King spoke.

Looking down at the relic it was the Weapon of their Grandfather, which was stolen from them by the Elves for their master Hortana.
